PROFESSIONAL SUMMARY

Final-year BSc Digital Systems student at the University of Thessaly with hands-on experience designing, building and deploying backend and full-stack applications. Strong focus on Java/Spring Boot, TypeScript/React, Node.js/NestJS, PostgreSQL, REST APIs, Docker and Linux. Projects include authentication and RBAC, real-time features, testing, monitoring, automation and self-hosted deployments. I use an AI-assisted development workflow with Codex and Antigravity for research, implementation support, debugging, testing and documentation while reviewing and validating the final code and technical decisions.

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, SQL
Backend & APIs: Node.js, NestJS, REST APIs
Frontend: React, Next.js
Databases & ORM: PostgreSQL, Prisma, Firebase / Firestore
DevOps & Testing: Docker, Linux, Git, Jest, Playwright

PROJECTS

HomeOps - Homelab Operations & Observability Platform | Jul 2026 - Present

React, Node.js, REST APIs, Docker, Linux, Cloudflare

- Designed and built a self-hosted operations platform for monitoring services, containers, networks and infrastructure, including health checks, alerts, incident tracking, historical data and dependency mapping.
- Worked end-to-end across backend APIs, dashboards, Docker/Linux deployment, monitoring and troubleshooting, with ongoing automation and reliability improvements.

Municipal Police Management Platform | May 2026 - Present

React, TypeScript, Tauri, NestJS, Prisma, PostgreSQL, Socket.IO, Docker

- Designed and developed a full-stack desktop and backend platform with REST APIs, PostgreSQL data models, JWT authentication, RBAC, audit history, ticket and vehicle workflows, real-time updates and PDF reporting.
- Implemented Greek/Greeklish fuzzy search with typo tolerance, automated testing and containerized deployment.

HomeLabShare - Self-Hosted File Sharing Platform | Apr 2026 - Present

Next.js, TypeScript, Prisma, PostgreSQL, Docker, Cloudflare

- Designed and deployed a self-hosted file-sharing platform with authentication, invite-based access, per-user storage quotas, uploads, share links, favourites, recent files and administration tools.
- Built a PostgreSQL-backed, containerized deployment exposed through a secure Cloudflare-based setup.

Shiftoryx - Workforce Scheduling Platform | Jan 2026 - Present

React, TypeScript, Firebase / Firestore, Zustand, dnd-kit, Vercel

- Built a workforce scheduling application with rule-based schedule generation, employee availability and leave handling, shift constraints, manual editing, analytics, history and export functionality.
- Designed complex scheduling logic and business rules while maintaining responsive UX and reliable data synchronization.

EDUCATION

University of Thessaly - BSc in Digital Systems | Larisa, Greece | Oct 2023 - Present

Entering final year; focus on software engineering, web development, databases, artificial intelligence, networks and digital systems.

ADDITIONAL EXPERIENCE

BP - Gas Station Employee | Mar 2023 - Aug 2026

Worked in a fast-paced customer-facing environment, following operational procedures, handling responsibilities accurately and maintaining consistent service.

Hellenic Armed Forces - Special Forces | Jul 2022 - Mar 2023

Completed military service; strengthened discipline, teamwork, reliability, adaptability and decision-making under pressure.

LANGUAGES & CERTIFICATIONS

Greek - Native | English - C2 Proficiency | ECDL - Word & Excel | Univators 2.0: Machine Learning & Artificial Intelligence, Code.Hub (18 hours, 2025)
